Circular saw blades

WOOD

Universal (WU)
Rip and cross cuts in wooden boards (plywood, formwork, OSB, particle/ chip board, MDF, wood composites and solid wood (hard & soft)) and const-ruction timber.

Clean Cut (WS CC)
Clean cross cuts in wooden boards (plywood, formwork, OSB, particle/ chip board, MDF, wood composites and solid wood (hard & soft)) and plastics.

Fast & Tough (WS FT)
Fast rip and cross cuts in abrasive and wooden boards (gypsum, fiber, fiber cement, formwork, plywood, particle, MDF), construction timber and wood with nails.

Special for Cordless (A)
Ultra thin kerf blade with friction reducing Teflon coating for faster cutting speed and more cuts per charge

For use with	Blade Type	Blade diameter x Arbor (mm)	No of teeth	Kerf width/ Blade thickness	Max. rpm	Item no.	Gypsum- / Fiber board	Gypsum-/ Plasterboard	Fiber cement board / Eternit	Wood with nails / concrete remains	Construction timber	Solid wood (hard/soft)	Wood composite	Peri / Plywood	Particle- / Chip board & MDF	OSB	Acrylic glass / Plexi	PVC / Plastics	Corian

METAL

Steel (MU)
Cold cuts in ferrous metal and structural panels (channel iron, pipe, angle iron, steel plate, threaded rod, rebar, sandwich panel, Trespa).

Aluminum (MS AL)
Cold cuts in channels, tubes, plates and grating made of aluminum and other non-ferrous metals.
